SUMMARY

B.Tech graduate in Electronics and Communication Engineering with professional experience as a Software Development Engineer Intern. Proficient in MERN stack development, including React.js, Node.js, Express.js, and MongoDB. Skilled in building responsive user interfaces, designing scalable RESTful APIs, and implementing secure JWT authentication. Seeking a Software Development Engineer (SDE) role to contribute high-quality software solutions and collaborate in fast-paced teams.

TECHNICAL SKILLS

Languages & Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3
Backend & Database: Node.js, Express.js, MongoDB, REST APIs
Tools & Concepts: Git, GitHub, JWT Authentication, CRUD Operations

EXPERIENCE

Software Development Engineer Intern | Tilicho Labs

Jan 2026 - May 2026

- Gained hands-on experience building scalable, full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
- Developed responsive React.js user interfaces and integrated backend APIs for full-stack web applications.
- Designed RESTful APIs with JWT-based authentication and MongoDB integration.
- Optimized MongoDB database queries and schemas, reducing API response latency for data-heavy operations.
- Contributed to collaborative Agile sprints, actively participating in code reviews and version control workflows via Git/GitHub.

PROJECTS

InterviewPrep AI - Interactive Mock Interview Platform

[Live Demo](#)

React.js, Node.js, Express.js, MongoDB, Gemini LLM, Web Audio API

- Developed a full-stack web app that simulates technical interviews with dynamic, speech-to-text audio recording using the Web Audio API.
- Integrated Google Gemini API to analyze candidate transcripts, generating automated technical correctness scores and communication feedback.
- Built a performance analytics dashboard in React with visual charts to track candidate strengths and weaknesses over time.

Netflix Clone - Video Streaming & Discovery Platform

React.js, Firebase Auth, TMDB API, React Router, React Toastify, CSS3

- Developed a responsive Netflix replica using React.js and Vite, featuring a dynamic hero banner and interactive UI components.
- Integrated TMDB API to fetch real-time media metadata, posters, and category breakdowns, enabling seamless content discovery.
- Configured Firebase Authentication for user registration/login, utilizing React Router to build secure route guards.

CERTIFICATIONS

SDE Intern Certificate | Tilicho Labs (Jan 2026 - May 2026)

Completed intensive software development training focused on MERN stack and software engineering.

EDUCATION

B.Tech in Electronics and Communication Engineering

May 2026

Lendi Institute of Engineering and Technology, Vizianagaram
