

SRINU MADDINENI

Frontend Developer | React.js | Node.js | Web Development

+91 8374428832 | maddineis76@gmail.com | Vizianagaram, Andhra Pradesh | leetcode.com/u/srinu_maddineni

Portfolio: srinu-maddineni.github.io/Portfolio

- React.js
- JavaScript (ES6+), TypeScript
- Node.js, Express.js
- MongoDB
- Git & GitHub
- Python & DSA
- Basic System Design

LANGUAGE

Native Telugu.

Proficient English.

CERTIFICATIONS

JavaScript (Intermediate)

— HackerRank

Frontend Developer

— Infosys Springboard

DBMS

— NPTEL

PROFESSIONAL SUMMARY

Motivated B.Tech student in Electronics & Communication Engineering with a strong passion for full-stack web development. Currently working as a Frontend Developer Intern at Tilicho Labs. Proficient in React.js, JavaScript (ES6+), TypeScript, Node.js, and Express.js. Experienced in building responsive web applications, developing RESTful APIs, managing state with React Hooks, and implementing user authentication. Familiar with MongoDB and basic system design concepts. Seeking challenging opportunities to leverage technical skills and grow as a full-stack developer.

EDUCATION

LENDI INSTITUTE OF ENGINEERING AND TECHNOLOGY, Vizianagaram

2022 – 2026

B.Tech in Electronics and Communication Engineering

WORK EXPERIENCE

TILICHO LABS – Frontend Developer Intern Jul 2025 – Present (6 Months)

- Developed responsive React.js applications using JavaScript (ES6+) and TypeScript, following component-based architecture and modern best practices.
- Built and consumed RESTful APIs using Node.js and Express.js, handling routing, middleware, and JSON data exchange.
- Managed application state efficiently using React Hooks (useState, useEffect, useContext).
- Worked with MongoDB for data storage and retrieval as part of full-stack feature development.
- Applied basic system design principles to plan scalable component and API architectures.
- Collaborated with senior developers on code reviews and Git-based workflows.

PROJECTS

Netflix UI/UX Clone | React.js, Node.js, TMDb API, YouTube API, Firebase

- Built a responsive streaming platform with movie/TV browsing, search, and filtering features.
- Integrated YouTube IFrame API for trailer playback and Google Authentication via Firebase.
- Used React Router for smooth navigation and React Hooks for efficient state management.

Task Management Web Application | JavaScript, Node.js, Express.js, MongoDB, Netlify

- Developed a full-featured task manager with add, delete, and task completion tracking.
- Built a backend REST API using Node.js and Express.js with MongoDB for persistent data storage; deployed live on Netlify.
